

ATTACHMENT A

Claims 1 - 8: (Cancelled)

9. (New) A concentrate comprising:

- a) polybutene-1;
- b) polypropylene; and
- c) up to 60% by weight of one or more additives.

10. (New) A concentrate according to claim 9 comprising (percentages by weight):

A) from 40% to 95% of a composition relative to the total weight of A) comprising:

- 1) from 10% to 35% of polybutene-1;
- 2) from 90% to 65% of polypropylene; and

B) from 5% to 60% of one or more additives.

11. (New) The concentrate according to claim 10, wherein the concentrate comprises from 50% to 95% by weight of the composition relative to the total weight of A).

12. (New) The concentrate according to claim 10, wherein the concentrate comprises from 60% to 80% by weight of the composition relative to the total weight of A).

13. (New) The concentrate according to claim 10, wherein the composition comprises from 25% to 35% by weight of polybutene-1.

14. (New) The concentrate according to claim 10, wherein the composition comprises from 30% to 35% by weight of polybutene-1.

15. (New) The concentrate according to claim 10, wherein the composition comprises from 75% to 65% by weight of polypropylene.

16. (New) The concentrate according to claim 10, wherein the composition comprises from 70% to 65% by weight of polypropylene.

17. (New) The concentrate according to claim 10, wherein the composition comprises from 5% to 50% by weight of one or more additives.

18. (New) The concentrate according to claim 10, wherein the composition comprises from 20% to 40% by weight of one or more additives.

19. (New) The concentrate according to claim 9, wherein the polybutene-1 is a linear, semicrystalline and highly isotactic homopolymer.

20. (New) The concentrate according to claim 9, wherein the polypropylene is isotactic polypropylene having an index of isotacticity greater than or equal to 90.

21. (New) The concentrate according to claim 9 for dispersing one or more additives in at least one polyolefin.

22. (New) Polyolefinic articles comprising the concentrate of claim 9, wherein the concentrate is blended with at least one polyolefin and then processed.

23. (New) Coloured polypropylene fibres comprising the concentrate of claim 9, wherein the concentrate is blended with at least one polyolefin and then spun.

24. (New) A polyolefinic composition for preparing concentrates of additives, comprising (percentages by weight):

- a) from more than 10% to 35% of polybutene-1; and
- b) from less than 90% to 65% of polypropylene.

25. (New) The polyolefinic composition of claim 24 comprising from 25% to 35% by weight of polybutene-1.

26. (New) The polyolefinic composition of claim 24 comprising from 30% to 35% by weight of polybutene-1.

27. (New) The polyolefinic composition of claim 24 comprising from 75% to 65% by weight of polypropylene.

28. (New) The polyolefinic composition of claim 24 comprising from 70% to 65% by weight of polypropylene.
